

AYMANE AIT DADS

AI Native Process Automation Intern | Workflow Automation · AI-Enabled Operations · LLM Orchestration

Ayman.Ait-dads@eurecom.fr | +33 7 60 92 50 93 | linkedin.com/in/aymane-ait-dads | Sophia Antipolis, France

PROFESSIONAL SUMMARY

Ranked 17th out of 3,000+ teams in the NVIDIA Nemotron Reasoning Challenge (score 0.86/1.0, \$106K+ prize pool) by building an end-to-end LoRA SFT pipeline on a 30B-parameter model - demonstrating the systematic problem-solving methodology this role requires. Reduced manual analysis time by 60% at Orange Maroc by automating feature engineering and model evaluation pipelines across 100K+ network records, delivering actionable business recommendations directly to operational stakeholders. Hands-on experience designing agentic pipelines, LLM orchestration with the Claude API, RAG systems, MCP servers, and AI workflow automation tools that map directly to the process automation scope described for this position. Aims to apply cross-functional AI automation skills within Phamily's healthcare operations environment to identify repetitive workflows, implement scalable AI-enabled solutions, and expand operational efficiency across clinical and corporate functions.

CORE COMPETENCIES

AI-Enabled Workflow Automation | Process Optimization | Agentic Pipelines | LLM Orchestration | Cross-Functional Collaboration | Prompt Engineering | Operational Efficiency | Emerging AI Technologies

WORK EXPERIENCE

Orange Maroc

Jul 2024 - Aug 2024

Data Science Intern - Casablanca, Morocco

- Automated feature engineering and model evaluation workflows, reducing **manual analysis time by ~60%** across 100K+ fiber-optic network records for the network optimization team.
- Designed and implemented an end-to-end **AI-enabled clustering pipeline** mapping customer performance profiles to 5 commercial service tiers, directly informing operational maintenance decisions.
- Built Random Forest and K-Means models on upload speed, latency, and jitter data to classify network quality across **thousands of infrastructure nodes**, improving scalability of QA processes.
- Delivered stakeholder presentations translating model outputs into **actionable maintenance recommendations**, partnering cross-functionally with the network operations and business teams.

PROJECTS

AI Native Automation Workflows - Claude API, RAG & Agentic Pipelines

Independent Study · 2024-2025 · LLM Orchestration & Tool-Calling

- Built and tested **agentic pipelines and MCP server integrations** using Claude API, LangChain, and RAG architectures to automate multi-step workflows and streamline information retrieval tasks.
- Designed prompt engineering strategies and tool-calling workflows to automate repetitive processes, applying the same **systematic methodology** this role requires for operational process optimization.

Claude API · LangChain · RAG · REST APIs · Supabase

NVIDIA Nemotron Model Reasoning Challenge

Kaggle · In Progress (June 2026) · Ranked 17th / 3,000+ Teams

- Ranked **17th / 3,000+ teams** (score 0.86/1.0, \$106K+ prize pool) in the NVIDIA Nemotron Reasoning Challenge by fine-tuning a **30B-parameter Mamba-Transformer** with LoRA SFT (r=32, BF16, completion-only loss, 8,192-token context), owning the full training pipeline end-to-end.
- Ran **controlled ablation experiments** across LR schedules, packing strategies, and synthetic augmentation - discovering that reasoning-style consistency outweighs data volume in LLM SFT; built custom cipher parsers and 8-bit operation solvers for verified chain-of-thought data.

EDUCATION

Engineering Degree in Data Science (Master-level) - EURECOM

Sep 2023 - Present

Relevant coursework: Machine Learning, Deep Learning, NLP, Cloud Computing, Computer Vision, Web Applications, Statistics, Image Security

CPGE - Mathematics & Physics - Ibn Timiya

2021 - 2023

SKILLS

AI Automation & LLM Tools: Claude API | LangChain | Agentic Pipelines | RAG | Prompt Engineering | MCP Server | LLM Orchestration

ML Frameworks & Engineering: PyTorch | Hugging Face Transformers | Unsloth | TRL | PEFT | Scikit-learn | vLLM

Data, Cloud & Infra: Python | SQL | Pandas | Power BI | Supabase | REST APIs | Docker | PostgreSQL
