Hiring Team - AI Intern (Fresh Grad /Final Sem - 6 months)

Avanade Asia Company · Singapore

Dear Avanade AI Engineering Team,

Avanade's AI Engineering Team is looking for **analytical and innovative data talent** - the kind who ships real systems, not just experiments. Ranked **#1 on the EURECOM private leaderboard** by fine-tuning a **428M-parameter CLIP ViT-L/14** on 250K images spanning 25+ generator types, I build AI that holds up under real distribution shift - exactly the engineering rigour your team rewards.

At **Orange Maroc**, I owned an end-to-end **ML pipeline** across **100K+ network telemetry records**, cutting manual analysis time by **~60%** and delivering KMeans segmentation that directly shaped commercial tier decisions - proof that I connect models to business outcomes. Separately, I designed systematic **ablation studies** across unfreezing depth, learning rate schedules, and **FP16 mixed precision** training, matching the research discipline Avanade's AI team applies to production deployments.

Avanade sits at the intersection of Microsoft's AI stack and enterprise delivery across Asia - a pairing that means work here reaches production at scale, not a sandbox. I would welcome the chance to discuss how my background fits the team's current roadmap.

Sincerely,

AYMANE AIT DADS
