

AYMANE AIT DADS

AI-Driven Software Development Intern | Python · Data Analysis · Intelligent Automation

Ayman.Ait-dads@eurecom.fr | +33 7 60 92 50 93 | linkedin.com/in/aymane-ait-dads | Sophia Antipolis, France

PROFESSIONAL SUMMARY

Data science engineering student who reduced manual analysis time by 60% at Orange Maroc by building automated machine learning pipelines on 100K+ fiber-optic network records, delivering executive-ready Power BI dashboards and maintenance recommendations directly to the network optimization team. Ranked 1st in EURECOM class for AI-generated image detection (0.791 AUC) and placed top 10% on a Kaggle competition with a \$106K+ prize pool, demonstrating consistent delivery of measurable, data-driven results. Proficient in Python, SQL, Power BI, Pandas, Scikit-learn, and machine learning-driven analysis aligned with intelligent automation and requirements engineering workflows. Available for a hybrid internship in Guadalajara, Mexico; holding a French engineering student visa with flexibility for international placement.

CORE COMPETENCIES

Python Scripting | Machine Learning Analysis | Power BI Dashboards | Intelligent Automation | Data Architecture | Web Development | Requirements Engineering | Data-Driven Insights

WORK EXPERIENCE

Orange Maroc

Jul 2024 - Aug 2024

Data Science Intern - Casablanca, Morocco

- Designed and deployed a **Power BI dashboard** translating Random Forest and K-Means model outputs into actionable maintenance recommendations for the network optimization team.
- Engineered an automated machine learning pipeline on **100K+ fiber-optic records** (upload speed, latency, jitter), reducing manual analysis time by approximately 60% through feature engineering and model evaluation scripts.
- Built a clustering pipeline mapping customer performance profiles to **5 commercial service tiers**, providing data architecture output consumed directly by business stakeholders.
- Delivered stakeholder presentations translating **machine learning-driven analysis** of network quality across thousands of nodes into prioritized, cost-saving operational recommendations.

PROJECTS

Twitter Sentiment Analysis - End-to-End NLP Pipeline

EURECOM Academic Project · 2025 · Business NLP

- Constructed a complete **data architecture pipeline** from raw text through tokenization, TF-IDF, word2vec embeddings, and transformer fine-tuning for production-ready sentiment classification.
- Applied systematic hyperparameter optimization and ablation scripting in Python to maximize classification accuracy, directly mapping to **intelligent automation** and requirements engineering workflows.

Python · Hugging Face Transformers · Scikit-learn · Pandas

Aerial Cactus Detection - Drone Image Classification

EURECOM Academic Project · 2025 · 99.8% Accuracy

- Benchmarked CNN, DenseNet121, and hybrid CNN-Transformer architectures on **17,500+ drone images**, achieving 99.8% accuracy, F1 = 0.999, and ROC AUC = 1.0 for endangered-species classification.
- Delivered a full machine learning-driven analysis report with **data-driven insights** on model selection, feature behavior, and deployment trade-offs across three architectures.

PyTorch · DenseNet121 · Scikit-learn · Matplotlib

EDUCATION

Engineering Degree in Data Science (Master-level) - EURECOM

Sep 2023 - Present

Relevant coursework: Machine Learning, Deep Learning, Statistics, Cloud Computing, Web Applications, Computer Vision, NLP, Image Security

CPGE - Mathematics & Physics - Ibn Timiya

2021 - 2023

SKILLS

Data Science & Analytics: Python | SQL | Power BI | Pandas | NumPy | Scikit-learn | Feature Engineering

Machine Learning & AI: PyTorch | Hugging Face Transformers | NLP | Computer Vision | Clustering | Ensemble Methods

Engineering & Infrastructure: Bash Scripting | Git | REST APIs | PostgreSQL | Docker | Linux | Matplotlib
