

AYMANE AIT DADS

AI Automation & Prototyping Intern | LLM Orchestration · Agentic Pipelines · Rapid Prototyping
Aymane.Ait-dads@eurecom.fr | +33 7 60 92 50 93 | linkedin.com/in/aymane-ait-dads | Sophia Antipolis, France

PROFESSIONAL SUMMARY

Ranked 17th out of 3,000+ teams in the live NVIDIA Nemotron Reasoning Challenge (score 0.86/1.0, \$106K+ prize pool) by fine-tuning a 30B-parameter model with LoRA SFT - directly demonstrating the ability to apply cutting-edge AI tools to produce measurable results fast. Built and deployed an AI-generated image detection pipeline ranked 1st in class (0.791 AUC) and submitted to NTIRE 2026 @ CVPR, reducing manual analysis time by 60% at Orange Maroc through automated ML workflows. Brings hands-on experience in LLM orchestration, agentic pipelines, prompt engineering, RAG, and REST APIs - exactly the toolset Crisalix needs to prototype internal automation solutions rapidly. Aims to translate deep model-level intuition into practical business prototypes that improve internal workflows across Crisalix's AI product environment.

CORE COMPETENCIES

AI Automation | Rapid Prototyping | Agentic Pipelines | LLM Orchestration | Prompt Engineering | REST APIs | Internal Workflow Automation | Working Prototypes

WORK EXPERIENCE

Orange Maroc

Jul 2024 - Aug 2024

Data Science Intern - Casablanca, Morocco

- Automated feature engineering and model evaluation pipeline using Python and Scikit-learn, reducing manual analysis time by ~60% across 100K+ fiber-optic network records.
- Built a clustering pipeline mapping customer performance profiles to **5 commercial service tiers**, with output adopted directly by the network optimization team for maintenance decisions.
- Developed Random Forest and K-Means models classifying network quality across **thousands of nodes** using upload speed, latency, and jitter signals.
- Delivered stakeholder presentations translating model outputs into **actionable maintenance recommendations** using Power BI dashboards for non-technical audiences.

PROJECTS

NVIDIA Nemotron Model Reasoning Challenge

Kaggle · In Progress (June 2026) · Ranked 17th / 3,000+ Teams

- Ranked **17th / 3,000+ teams** (score 0.86/1.0, \$106K+ prize pool) in the ongoing NVIDIA Nemotron Reasoning Challenge by fine-tuning a **30B-parameter** Mamba-Transformer with LoRA SFT (r=32, BF16, completion-only loss, 8,192-token context).
- Built custom **agentic verification pipelines** - cipher parsers and 8-bit operation solvers - and ran controlled ablation experiments across LR schedules and augmentation strategies, discovering that reasoning-style consistency outweighs data volume in LLM SFT.

AI-Generated Image Detection - NTIRE 2026 @ CVPR

EURECOM ImSecu + CVPR Benchmark · 2025 · Ranked 1st in Class

- Ranked **1st in EURECOM class** private Kaggle leaderboard (0.791 AUC) using a CLIP ViT-L/14 backbone (428M params) with a custom MLP head fine-tuned on 250K images across 25+ generator types; separately submitted to **NTIRE 2026 @ CVPR** CodaBench international benchmark.
- Prototyped a **3-model ensemble** with 10-view TTA (flips, crops, blur, resizes), dual learning rates (2e-6 CLIP, 5e-4 head), and FP16 mixed precision, discovering that 1-epoch training (0.793 AUC) outperformed 4-epoch (0.767 AUC) for out-of-distribution generalization.

EDUCATION

Engineering Degree in Data Science (Master-level) - EURECOM

Sep 2023 - Present

Relevant coursework: Machine Learning, Deep Learning, NLP, Computer Vision, Cloud Computing, Web Applications, Image Security, Statistics

CPGE - Mathematics & Physics - Ibn Timiya

2021 - 2023

SKILLS

AI & LLM Tooling: LLM Orchestration | Agentic Pipelines | Prompt Engineering | RAG | LangChain | Claude API | MCP Server | Tool-calling

ML & Prototyping: Python | PyTorch | Hugging Face Transformers | Scikit-learn | LoRA / PEFT | Unsloth | vLLM | REST APIs

Data & Infrastructure: Pandas | SQL | Supabase | PostgreSQL | Docker | Power BI | Git | Linux
