PROFESSIONAL SUMMARY

Reduced manual analysis time by ~60% at Orange Maroc by building automated ML pipelines on 100K+ fiber-optic network records, delivering Power BI dashboards and maintenance recommendations directly to business stakeholders. Developed a customer segmentation pipeline mapping performance profiles to 5 commercial service tiers, translating complex model outputs into actionable insights for non-technical audiences. Brings hands-on experience in SQL, Python, Pandas, NLP, and structured data analysis - plus demonstrated ability to bridge technical models and business decisions - directly applicable to building AI-powered natural language query solutions. Aims to extend these capabilities at Claro Enterprise Solutions by supporting development of secure, accurate AI tools that enable non-technical users to access and analyze structured databases through natural language.

CORE COMPETENCIES

Natural Language Querying | Structured Database Analytics | Data Visualization | AI-Powered Solutions | Actionable Insights | Business Stakeholder Communication | SQL Analytics | NLP Pipeline Development

WORK EXPERIENCE

Orange Maroc

Jul 2024 - Aug 2024

Data Science Intern - Casablanca, Morocco

- Translated model outputs into **actionable maintenance recommendations** delivered via Power BI dashboards and stakeholder presentations to non-technical business and network teams.
- Developed a K-Means clustering pipeline that mapped customer performance profiles to **5 commercial service tiers**, output adopted directly by the network optimization team.
- Built Random Forest classification models on **100K+ fiber-optic network records** (upload speed, latency, jitter) to classify network quality across thousands of nodes.
- Reduced manual analysis time by **~60%** through automated feature engineering and model evaluation pipelines built in Python, Pandas, and Scikit-learn.

PROJECTS

Twitter Sentiment Analysis - End-to-End NLP Pipeline

EURECOM · 2025 · Full NLP Stack from Tokenization to Transformer Fine-Tuning

- Built an end-to-end **NLP pipeline** covering tokenization, TF-IDF, word2vec embeddings, and transformer fine-tuning for sentiment classification on real social media text.
- Applied hyperparameter optimization across model configurations to maximize classification accuracy, producing **easy-to-understand outputs** suitable for business-facing analytics use cases.

Python · Hugging Face Transformers · Scikit-learn · Pandas

Aerial Cactus Detection - Drone Image Classification

EURECOM · 2025 · 99.8% Accuracy · F1 = 0.999 · ROC AUC = 1.0

- Benchmarked CNN, DenseNet121, and hybrid CNN-Transformer architectures on **17,500+ drone images**, achieving 99.8% accuracy with F1 = 0.999 and ROC AUC = 1.0.
- Delivered structured model evaluation with **tabular and visual metric outputs** (accuracy, F1, AUC) enabling clear comparison across architectures for non-technical reporting.

PyTorch · DenseNet121 · Scikit-learn · Matplotlib

EDUCATION

Engineering Degree in Data Science (Master-Level) - EURECOM

Sep 2023 - Present

Relevant coursework: Machine Learning, Deep Learning, NLP, Statistics, Cloud Computing, Computer Vision, Web Applications, Image Security

CPGE - Mathematics & Physics - Ibn Timiya

2021 - 2023

SKILLS

Data Science & Analytics: SQL | Python | Pandas | NumPy | Power BI | Matplotlib | Seaborn

AI & NLP: Hugging Face Transformers | NLP Pipelines | Prompt Engineering | RAG | LangChain | Scikit-learn

Infrastructure & Tools: Git | REST APIs | PostgreSQL | Docker (basic) | Supabase | Linux
