

AYMANE AIT DADS

AI & Automation Intern | Credit Intelligence · ML Pipeline Engineering · LLM Fine-Tuning

Ayman.Ait-dads@eurecom.fr | +33 7 60 92 50 93 | linkedin.com/in/aymane-ait-dads | Sophia Antipolis, France

PROFESSIONAL SUMMARY

Ranked 17th out of 3,000+ teams in the NVIDIA Nemotron Reasoning Challenge (score 0.86/1.0, \$106K+ prize pool) by designing and owning an end-to-end LoRA SFT pipeline for a 30B-parameter model - directly demonstrating the ML pipeline engineering and automation skills Credix requires for its credit intelligence platform. At Orange Maroc, automated network quality classification across 100K+ records, reducing manual analysis time by 60% and delivering production-ready clustering outputs that mapped directly to commercial decision-making - the same data-to-decision workflow underpinning embedded finance credit decisioning. Brings hands-on expertise in Python, PyTorch, feature engineering, ensemble methods, and end-to-end ML automation, with additional experience in REST APIs, SQL, and cloud infrastructure relevant to Credix's real-time credit systems. Aims to apply ablation-tested model design and automation pipelines to accelerate credit risk intelligence and SME lending decisioning in Latin America.

CORE COMPETENCIES

Credit Intelligence | ML Pipeline Automation | LLM Fine-Tuning | Feature Engineering | Risk Modeling | Embedded Finance | Data-Driven Decisioning | REST API Integration

WORK EXPERIENCE

Orange Maroc Jul 2024 - Aug 2024
Data Science Intern - Casablanca, Morocco

- Built Random Forest classification and K-Means clustering models on **100,000+ fiber-optic network records**, mapping customer performance profiles to 5 commercial service tiers used directly by the network optimization team.
- Reduced manual analysis time by **~60%** through automated feature engineering pipelines and systematic model evaluation, enabling faster operational decisions at scale.
- Developed an end-to-end **ML automation pipeline** covering data ingestion, feature extraction, model training, and clustering output delivery - mirroring production ML workflows in credit decisioning contexts.
- Delivered stakeholder presentations translating model outputs into actionable maintenance recommendations, bridging **data science outputs and business decision-making** for non-technical audiences.

PROJECTS

NVIDIA Nemotron Model Reasoning Challenge Kaggle Competition · In Progress (Jun 2026) · Top 17 / 3,000+ Teams

- Ranked **17th / 3,000+ teams** (score 0.86/1.0, \$106K+ prize) in the NVIDIA Nemotron Reasoning Challenge by fine-tuning a **30B-parameter Mamba-Transformer** with LoRA SFT (r=32, BF16, completion-only loss, 8,192-token context).
- Ran **controlled ablation experiments** across LR schedules, packing strategies, and synthetic augmentation - discovering that reasoning-style consistency outweighs data volume in LLM SFT; built custom cipher parsers and 8-bit operation solvers for verified CoT data.

AI-Generated Image Detection - NTIRE EURECOM ImSecu + NTIRE 2026 @ CVPR CodaBench · 2025 · Ranked 1st in EURECOM Class 2026 @ CVPR

- Ranked **1st in EURECOM class leaderboard** (0.791 AUC) by fine-tuning CLIP ViT-L/14 (428M params) with a custom MLP head, dual learning rates, and 10-view TTA ensemble across 250K training images from 25+ generator types.
- Submitted independently to **NTIRE 2026 @ CVPR CodaBench** international benchmark; discovered that 1-epoch training (0.793 AUC) outperformed 4-epoch training (0.767 AUC), demonstrating robust out-of-distribution generalization.

EDUCATION

Engineering Degree in Data Science (Master-level) - EURECOM Sep 2023 - Present
Relevant coursework: Machine Learning, Deep Learning, Statistics, NLP, Computer Vision, Cloud Computing, Web Applications, Image Security

CPGE - Mathematics & Physics - Ibn Timiya 2021 - 2023

SKILLS

ML Frameworks & Engineering: PyTorch | Scikit-learn | Hugging Face Transformers | Unsloth | TRL | PEFT | vLLM
Data Science & Automation: Python | SQL | Pandas | NumPy | feature engineering | ensemble methods | Power BI
Infrastructure & APIs: REST APIs | Docker | PostgreSQL | Supabase | Git | Linux | LoRA | BF16/FP16
