

AYMANE AIT DADS

Data Science Intern | Exploratory Data Analysis · Predictive Modeling · Business Intelligence

Ayman.Ait-dads@eurecom.fr | +33 7 60 92 50 93 | linkedin.com/in/aymane-ait-dads | Sophia Antipolis, France

PROFESSIONAL SUMMARY

Built and deployed Random Forest and K-Means models on 100K+ fiber-optic network records at Orange Maroc, reducing manual analysis time by ~60% and directly informing network optimization decisions for a commercial team. Ranked 17th out of 3,000+ teams in the NVIDIA Nemotron Reasoning Challenge (score 0.86/1.0, \$106K+ prize pool), demonstrating end-to-end model development ownership across a 30B-parameter architecture. Brings cross-functional collaboration experience translating complex model outputs into actionable stakeholder recommendations, with hands-on skills in Python, SQL, Pandas, Power BI, and feature engineering aligned to HERE's multidisciplinary data science workflow. Aims to contribute data-driven insights to HERE's location intelligence platform by applying rigorous exploratory data analysis, clustering, and ensemble methods to ambiguous, large-scale geospatial and business problems.

CORE COMPETENCIES

Exploratory Data Analysis | Model Development | Feature Engineering | Cross-functional Collaboration | Data Storytelling | Predictive Modeling | Business Intelligence | Ensemble Methods

WORK EXPERIENCE

Orange Maroc

Jul 2024 - Aug 2024

Data Science Intern - Casablanca, Morocco

- Developed a **clustering pipeline mapping customer performance profiles to 5 commercial service tiers** using K-Means on 100K+ fiber-optic network records, with output adopted directly by the network optimization team.
- Built Random Forest classification models on upload speed, latency, and jitter features to assess network quality across thousands of nodes, achieving **~60% reduction in manual analysis time** through automated feature engineering.
- Designed and delivered **Power BI stakeholder presentations** translating model outputs into prioritized maintenance recommendations, bridging technical findings with business decision-making.
- Executed end-to-end **data science workflow** - exploratory data analysis, model evaluation, and reporting - on a 100K+ record dataset using Python, Scikit-learn, and Pandas within a two-month internship scope.

PROJECTS

Aerial Cactus Detection - Endangered Species Classification

EURECOM · 2025 · 99.8% Accuracy

- Benchmarked CNN, DenseNet121, and hybrid CNN-Transformer architectures on **17,500+ drone images**, achieving 99.8% accuracy, F1 = 0.999, and ROC AUC = 1.0 for endangered species classification.
- Conducted rigorous **model development and evaluation** across multiple architectures using ensemble methods and cross-validation to deliver production-ready classification performance.

PyTorch · DenseNet121 · Scikit-learn · Pandas · Kaggle GPU

NVIDIA Nemotron Model Reasoning Challenge

Kaggle · In Progress (June 2026) · Ranked 17th / 3,000+ Teams

- Ranked **17th / 3,000+ teams** (score 0.86/1.0, \$106K+ prize pool) in an ongoing competition by fine-tuning a 30B-parameter Mamba-Transformer with LoRA SFT, owning the full model development and evaluation workflow.
- Built **custom verification pipelines** - including cipher parsers and 8-bit operation solvers - and ran controlled ablation experiments across LR schedules and augmentation strategies to isolate root causes of model failure across 5 reasoning categories.

PyTorch · Unsloth · Hugging Face Transformers · PEFT · vLLM

EDUCATION

Engineering Degree in Data Science (Master-level) - EURECOM

Sep 2023 - Present

Relevant coursework: Machine Learning, Deep Learning, Statistics, Computer Vision, NLP, Cloud Computing, Image Security, Web Applications

CPGE - Mathematics & Physics - Ibn Timiya

2021 - 2023

SKILLS

Data Science & Analytics: Python | SQL | Pandas | NumPy | Power BI | Scikit-learn | Feature Engineering

Machine Learning & Modeling: PyTorch | Random Forest | K-Means Clustering | Ensemble Methods | TensorFlow | Hugging Face Transformers

Tools & Infrastructure: Git | Linux | Matplotlib | Seaborn | Docker (basic) | PostgreSQL | Bash
