

AYMANE AIT DADS

AI Engineer Intern | RAG Pipelines · Agentic AI · Python / LLM Deployment

Ayman.Ait-dads@eurecom.fr | +33 7 60 92 50 93 | linkedin.com/in/aymane-ait-dads | Sophia Antipolis, France

PROFESSIONAL SUMMARY

Ranked 17th out of 3,000+ teams in the NVIDIA Nemotron Reasoning Challenge (score 0.86/1.0, \$106K+ prize pool) by architecting an end-to-end LoRA SFT pipeline on a 30B-parameter model - directly demonstrating the LLM engineering depth this role requires. At Orange Maroc, built and deployed a Random Forest + K-Means production pipeline on 100K+ network records, reducing manual analysis time by 60% and delivering outputs consumed directly by the optimization team. Brings hands-on experience with RAG pipelines, agentic AI workflows, LLM orchestration, tool-calling, Claude API, LangChain, and MCP server construction - the precise applied AI stack listed in this role. Aims to accelerate Cistema's healthcare AI agent deployment by building reliable, production-grade RAG and agentic systems alongside the core engineering team.

CORE COMPETENCIES

RAG Pipeline Development | Agentic AI Deployment | LLM Orchestration | Python Engineering | Applied AI Engineering | Prompt Engineering | REST API Integration | Healthcare AI Tools

WORK EXPERIENCE

Orange Maroc Jul 2024 - Aug 2024

Data Science Intern - Casablanca, Morocco

- Built and deployed a **Random Forest + K-Means pipeline** on 100K+ fiber-optic network records - output adopted directly by the network optimization team for production maintenance decisions.
- Developed an automated clustering pipeline that mapped customer performance profiles to **5 commercial service tiers**, replacing a fully manual segmentation workflow.
- Reduced manual analysis time by **~60%** through automated feature engineering, model evaluation, and Power BI reporting integrated into the team's existing data workflow.
- Delivered stakeholder presentations translating model outputs into **actionable maintenance recommendations**, bridging data science findings and business decision-making for non-technical audiences.

PROJECTS

NVIDIA Nemotron Model Reasoning Challenge - Kaggle (In Progress) Kaggle Competition · June 2026 · Ranked 17th / 3,000+ Teams

- Ranked **17th / 3,000+ teams** (score 0.86/1.0, \$106K+ prize pool) in the ongoing NVIDIA Nemotron Reasoning Challenge by fine-tuning a **30B-parameter Mamba-Transformer** with LoRA SFT (r=32, BF16, completion-only loss, 8,192-token context, grad_accum=32).
- Ran **controlled ablation experiments** across LR schedules, packing strategies, and synthetic augmentation - discovering that reasoning-style consistency outweighs data volume in LLM SFT; built custom cipher parsers and 8-bit operation solvers for verified chain-of-thought data.

PyTorch · Unsloth · TRL · PEFT · Hugging Face Transformers · vLLM · Kaggle GPU

AI-Powered Agentic & RAG Tooling - Applied AI Stack Personal Projects · 2024-2025 · Production-Grade Pipelines

- Designed and implemented **agentic pipelines** using LangChain, Claude API, tool-calling, and MCP server construction - covering the full RAG pipeline lifecycle from document ingestion to grounded LLM response generation.
- Integrated **Supabase (PostgreSQL)** vector stores with REST APIs and Docker-based infrastructure to support retrieval-augmented generation workflows and context-aware LLM orchestration.

LangChain · Claude API · Supabase · PostgreSQL · REST APIs · Docker · Python

EDUCATION

Engineering Degree in Data Science (Master-Level) - EURECOM Sep 2023 - Present

Relevant coursework: Machine Learning, Deep Learning, NLP, Computer Vision, Cloud Computing, Statistics, Web Applications, Image Security

CPGE - Mathematics & Physics - Ibn Timiya 2021 - 2023

SKILLS

AI / LLM & Agentic Engineering: RAG Pipelines | LangChain | Claude API | LLM Orchestration | Tool-Calling | Prompt Engineering | MCP Server

ML Frameworks & LLM Fine-Tuning: PyTorch | Hugging Face Transformers | LoRA / PEFT | Unsloth / TRL | vLLM | Scikit-learn | TensorFlow

Data, Cloud & Infrastructure: Python | SQL | Supabase | PostgreSQL | REST APIs | Docker | Git | Power BI
